

Programme management for Outermost regions

Draft agenda, 20 June 2018

Brussels, Belgium

The exact venue will be communicated at a later stage.

Programme management for Outermost regions

20 June 2018
Brussels, Belgium

Outline

The Interreg programmes of the Outermost regions face very specific challenges when it comes to the implementation of their work, partly because of their geographical situation and the type of countries they cooperate with which require certain mechanisms. In this context, Interact is organising a one-day event to offer these programmes a platform to discuss with the relevant European institutions, and to provide them with the necessary knowledge and practices to address these challenges.

Who is it for?

This event is targeting the heads of secretariat and managing authorities of the following Interreg cross-border and/or transnational programmes:

- Interreg Caribbean
- Interreg Saint Martin/Sint Marteen
- Interreg Amazonia
- Interreg Spain-Portugal (Madeira, Canaries and Azores – (MAC))
- Interreg Indian Ocean
- Interreg V- Mayotte-Comores
